

VEGA LITE

6000 lumen cabled LED work light with 2 x outlet

VEGA LITE is a part of a range of three innovative, sturdy, lightweight LED floodlights for the professional market, which provides high quality illumination to a variety of indoor and outdoor areas.

Compared to the previous version, the light output of the upgraded VEGA LITE has been increased from 4000 lumen to 6000 lumen. The powerful LEDs provide a diffused and pleasant, non-blinding, uniform work light, with a large dispersion. With a great design, performance and durability, the new VEGA LITE offers a strong light output and high quality at an attractive price.

The robust housing of the VEGA LITE is made of a highly shock-resistant plastic material, perfect for a working environment. Since the LEDs do not produce heat, there is no fire hazard when using the floodlight.

VEGA LITE comes with an integrated carrying handle and a stand for direct mounting of the lamp on the SCANGRIP TRIPOD. Two built-in power outlets on the backside make it possible to add more lamps or other equipment without the use of extra cabling – quick and easy.
