

INSTRUCTIONS FOR USE:

Thank you for purchasing the Bigboi PRO. Before you start enjoying the features and benefits of touchless drying please take a minute to read the below and familiarizes yourself with the dryer.

IN THE BOX

- Bigboi Blower PRO
- 5 meter hose
- 1 replacement filter
- 2 hose nozzles

Open the dryer box, take out the dryer, and check its appearance, if there is no damage; go on with following steps:

1. Place or fix the dryer, connecting the hose with connection screw, fastening clockwise with 45 degree.
2. Plug in the dryer (please make sure the power supply voltage in your country matches the machine);
3. Switch on the dryer and adjust it to your desired wind speed and temperature (air flow and temperature adjustable). Then the dryer can begin the drying process.

For further information on any Bigboi products please contact info@bigboi.com.au

IMPORTANT NOTICE

1. This machine use AC power source, power must have good grounding before used.
2. To maintain a smooth flow of air, please keep a safe distance from the surface. This will allow the warm filtered air to travel smoothly over a larger surface making the drying more efficient and preventing taking in water which may damage the machine.
3. Clean the filters regularly to ensure a smooth air flow.
4. If the motor does not work after being plug in, please turn off heat switch immediately to avoid damaging the heating element.
5. Do not let minors close or play with the machine!

MAINTENANCE INSTRUCTION

1. The shell of the machine can be cleaned with a soft cloth and neutral detergent solution (to avoid spoiling the paint work) then use a dry cloth to clean it;
2. Use water or strong fan to clean the filters regularly. Note that filters cannot be fixed on the machine until it is totally dry, in case the water may damage the machine. The machine has a standby filter packaged with it.
3. When the machine runs out of carbon brush, please contact a professional to check and update the required parts.

FUNCTIONS & FEATURES

Soft Start

Thanks to the protection from current buffers, when the dryer starts, the dryers will not discharge any impulse current, exerting no adverse influence upon the neighboring working electrical equipment.

Low Noise and Powerful Airflow

The specially-designed noise reduction system will deliver 10%-greater airflow than any other Twin-commercial grade motor dryers, with up to 4HP (2800watts) this model can dry your car, motorcycles, boat or ski faster in a less noise environment which will benefit the operator.

Full Function

This model is especially designed with high speed setting, which can work at full speed, as well as minimum airflow and high-heat settings, allowing precision drying and accurate wind speed when needed.

BBT (Bigboi Temperature Technology)

4 Stage adjustable warm filtered air set at 20c higher than the surrounding environment. All this available at a touch of your fingertips.

Adjustable wind control

With the twin motor set up, the PRO will allow you to adjust the wind speed of the two motors. Each motor has 2 stages (half and full).This will allow the user to adjust the wind speed from 30kmh to 288kmh.

Extra Long

We understand sizes matters, so at bigboi we have extended our commercial grade hose to a massive 3.5 meters. This will allow you to maneuver around your selected car, Motorcycles, boat or ski with ease.

Accessories

Visit **your supporting countries distributor website** to see how you can make your blower even more awesome with added accessories.
